

FOR IMMEDIATE RELEASE

## Encore Payment Systems Introduces Mobile Payment Processing through New iPhone Application

**Addison, TX. –July, 30 2009** – Addison, TX based Encore Payment Systems, [www.EncorePS.com](http://www.EncorePS.com), a leader in the electronic payment processing industry, is proud to introduce the Encore Payment Systems iPhone Mobile Application.

This new application gives small business merchants, independent contractors and mobile merchants the ability to utilize Encore's payment processing solutions without a need for hardware processing equipment or a dedicated internet line.

The application is currently available through Encore's sales team and is set up via a one-time installation process through a web browser. Upon installation the application icon is available on the home screen of the device for convenient future use.

Using the application, merchants can type the card information into the phone and the credit and debit card transactions are processed as "card-not-present" or "offline-debit" payments. Currently, receipts can be emailed to the cardholder however future enhancement plans include the ability for the merchant to print a receipt on the spot.

"At Encore Payment Systems our goal has always been to create a customized payment processing solution for the various needs of each business," said Vice President of Operations Robel Sebany. "With the growing technological advancements of these mobile devices we wanted to ensure our merchants had access to a payment processing option as portable as their business."

### About Encore Payment Systems
